The Os chair is a chair that can be completed by utilizing various objects around us. Most of the things around us are wasted because they are consumables that can only be discarded if they are broken. That's why I have designed the chair that can be replaced at any time with a variety of materials. By making various things such as wooden planks, clothes, boxes, wires and so on around us become part of this chair, we can rethink the waste of resources by giving new values to useless objects and using such finished chairs Give us an opportunity.

Let 's take it all together.

OS Chair!

Designed by Hyungmin Park

A good open hardware project creates an ecosystem. It works like a platform where a variety of actors meet and become productive. It opens up action spaces and business opportunities. It creates synergies between the different actors and allows everyone to do things that would otherwise not be possible or not so easy.

Open

Open Elements

- Drawing** — And a description o the thing
- Materiallist** — And a description o the thing
- .stl-file** — File for 3D printer output
- Brandname** — OS (open-source) Chair
- Manufacturing Instruction** — And a description o the thing

Ecosystem

Actors & Activities around it

- Consumers** — can buy this chair
- Repair & Reuse** — It is easy to repair or replace parts
- Teachers** — can use the design to teach students about bending steel
- Designer** — remix or develop further
- Recyclers** — can disassembly quickly and get the materials seperated for recycling
- Manufacturers** — Everyone can make and sell the design

Channels

Virtual & Physical channels for exchange in the ecosystem

- Website** — Like Thingiverse & Instructables
- Shop** — Online _ex) Amazon and Offline (Design store)
- Local Craftmen** — Customers go with the Drawing to their local craftmen
- Fairs** — to show the design and run workshops with it

Business Model

How does the system sustain itself?

- Donation** — If you use this chair and you really like it, please just give me financial support.
